

MOLYSLIP COPASLIP 500G HIGH TEMP ANTI-SEIZE COMPOUND

M113005

List Price ~~£13.89 each~~
Offer Price **£9.95 each**

MOLYSLIP MCC 450G METAL CUTTING COMPOUND

M240007

List Price ~~£11.52 each~~
Offer Price **£8.95 each**

A high-performance compound specifically formulated to protect fasteners from seizure-induced by extremes of temperature, pressure, and corrosion. The semi-synthetic base fluid is reinforced with anti-oxidants, corrosion inhibitors, and ultra-pure copper particles to provide outstanding protection to threads and components.

Features:

- Ensures consistent friction between threads
- Protects against galling and seizure
- Protects against rust and corrosion
- Eases assembly of tight-tolerance components
- Withstands extreme temperature up to +1100°C

Application:

COPASLIP™ is a high-performance compound specifically formulated to protect fasteners from seizure-induced by extremes of temperature, pressure, and corrosion. The semi-synthetic base fluid is reinforced with anti-oxidants, corrosion inhibitors, and ultra-pure copper particles to provide outstanding protection to threads and components. COPASLIP™ minimises variations in frictional interference between threads, allowing accurate and consistent assembly. It also prevents galling and seizure during assembly and dismantling – even after long periods of exposure to high temperatures, corrosive environments or high pressure.

Metal cutting compound. MCC is a low melt point metal working compound developed with extreme pressure additives and fortified with MoS2 to provide excellent performance and lubricity. Excellent extreme pressure and anti-wear performance.

Features:

- Excellent extreme pressure and anti-wear performance
- Maximises tool life in arduous operations
- Available in liquid, paste and aerosol form

Application:

MCC is a low melt point metal working compound developed with extreme pressure additives and fortified with MoS2 to provide excellent performance and lubricity.

MCC provides an excellent surface finish to components and protects tooling from wear and damage. Suitable for most drilling, reaming, tapping, single-point thread cutting and sawing operations on even the toughest workpiece materials.

MOLYSLIP 5LTR MSO MILKY SOLUBLE CUTTING OIL

M244055

List Price ~~£58.95 each~~
Offer Price **£44.95 each**

Mineral soluble oil. Proprietary base, blended with low-gravity, solvent-refined neutral oils and is completely free from cresylic acid, phenols and cresols, and the alkalinity is controlled at pH7. The product is odourless and is kind to the skin.

Features:

Excellent extreme pressure and anti-wear performance
Maximises tool life in arduous operations
Odourless and safe to use

Application:

Molyslip® MSO has been specially developed to improve performance on the machine tool and to promote better and safer working conditions for the operative.

MOLYSLIP 5LTR & 350ML MWF HIGH PERFORMANCE METAL CUTTING LUBRICANT

M241055

List Price ~~£89.27 each~~
Offer Price **£69.95 each**

M241003

List Price ~~£11.01 each~~
Offer Price **£8.95 each**

Metal working liquid. Concentrated neat cutting fluid containing a unique oil-soluble molybdenum compound together with extreme pressure anti-weld additives. Helps give greater cutting accuracy and prolonged tool life.

Features:

Excellent extreme pressure and anti-wear performance
Maximises tool life in arduous operations

Application:

Its extreme pressure agents help to prevent weld, or pick-up both with tough metals and light alloys.
MWF is especially useful for hobbing, gear shaping, thread grinding, broaching and tapping.
