

**DELTA ADHESIVE 50ML  
D333 PIPE SEALANT**

**D333 50ML**

List Price £23.64 each  
Offer Price £14.95 each

LOCTITE EQUIVALENT: 577  
BONDLOC EQUIVALENT: B567

A high viscosity anaerobic thread sealant of low/medium strength designed to lock and seal metal threaded pipes and fittings. The high lubricating properties provide easy assembly with no galling on all types of metal threaded pipes and fittings. An immediate low pressure seal is achieved once the fitting has been assembled.

**DELTA ADHESIVE 75ML D506  
PIPE SEALANT**

**D506 75ML**

List Price £25.53 each  
Offer Price £15.95 each

LOCTITE EQUIVALENT: D577  
BONDLOC EQUIVALENT: B577

A high performance anaerobic thread sealant designed for the locking and sealing of threaded pipes and fittings, while easing assembly due to the lubricating action of added PTFE. Packaged in a unique 'concertina' pack, giving easy application in even the most restricted areas, it is resistant to water, fuel, oils and most commonly encountered industrial fluids.

**DELTA ADHESIVE 50ML D55  
HIGH STRENGTH RETAINER**

**D55 50ML**

List Price £25.04 each  
Offer Price £15.75 each

LOCTITE EQUIVALENT: 638  
BONDLOC EQUIVALENT: B638

A very high strength anaerobic retaining compound for use when a permanent bond is required between closely fitting parts that are subject to stress, such as locking bushings and sleeves on shafts and housings. Can be used on gaps approaching 0.25mm, therefore useful for locking badly fitting parts.

**DELTA ADHESIVE 50ML D66 STUD GRADE ADHESIVE****D66 50ML**

**List Price** £23.64 each  
**Offer Price** £14.95 each

**LOCTITE EQUIVALENT:** 270**BONDLOC EQUIVALENT:** B271

A fast curing, high strength anaerobic thread locking compound for bonding and sealing threads and retaining cylindrical parts in general industrial and automotive applications. Ideal for use on fasteners up to 1" (25mm) in diameter, providing permanent locking and eliminating the need for 'double nutting'. Ideal for use with transmission and engine blocks in automotive applications.

**DELTA ADHESIVE 50ML D77 NUT GRADE ADHESIVE****D77 50ML**

**List Price** £23.64 each  
**Offer Price** £14.95 each

**LOCTITE EQUIVALENT:** 243**BONDLOC EQUIVALENT:** B243

A fast curing, medium strength anaerobic thread locking compound for bonding and sealing threads and retaining cylindrical parts in general industrial and automotive applications. Ideal for use with less active materials, such as stainless steel or plated parts. Provides an oil-resistant, semi-permanent lock and seal to all engineering and automotive fasteners, which prevents corrosion.

**DELTA ADHESIVE 50ML D88 RETAINING GRADE ADHESIVE****D88 50ML**

**List Price** £25.04 each  
**Offer Price** £15.75 each

**LOCTITE EQUIVALENT:** 603**BONDLOC EQUIVALENT:** B640

A low viscosity, high strength anaerobic retaining compound designed to permanently bond rigid engineering assemblies. With a higher temperature resistance than other anaerobic compounds, it can be used where a heat build up is expected. Used for retaining bushings and sleeves on housings or shafts, as well as bearings, keys and splines. Increases the overall strength of any mechanical assembly.

**DELTA ADHESIVE 50ML D888 HYDRAULIC GRADE ADHESIVE****D888 50ML**

**List Price** £25.04 each  
**Offer Price** £15.75 each

**LOCTITE EQUIVALENT:** 542**BONDLOC EQUIVALENT:** B569

A fast curing, high performance anaerobic thread sealant for locking and sealing metal threaded pipes and fittings. The product acts to prevent loosening and subsequent leakage from shock and vibration. Ideally suited to the sealing of hydraulic pipes and fittings, as well as other industrial and engineering applications.
