Lightweight, powder-free nitrile glove engineered for all-purpose protection without compromising dexterity. At 2.8 mil thickness and approximately 3.5–3.6 g per glove, it strikes a balance between strength and sensitivity, while a 240 mm cuff gives ample coverage. Its micro-textured surface, with added fingertip texture, ensures superior grip even in wet or slippery conditions. Free from latex and silicone, it minimises allergy risks and contamination, and is touchscreen-friendly, making it ideal for use in medical, laboratory, food handling, automotive, and general industrial settings.

Black Ideall® Grip is a heavy-duty, disposable nitrile glove designed for maximum performance and protection. Made from durable 5.2 mil thick nitrile and featuring a dual diamond-textured surface, it offers exceptional grip in wet or oily conditions while reducing hand fatigue. Latex-, powder-, and silicone-free, it provides strong chemical resistance and is rated AQL 1.5 for superior barrier protection. Touchscreen-compatible and food-safe, this glove is suitable for a wide range of industries including automotive, engineering, construction, agriculture, and janitorial work. With a lifespan up to five times longer than standard nitrile disposables, the Black Ideall® Grip combines comfort, control, and durability in one dependable solution.

Mercator Ideall® Grip Nitrile Gloves provide outstanding durability, comfort, and enhanced grip, making them perfect for tough jobs. Designed to resist a wide range of chemicals, they offer dependable protection in various demanding environments. The gloves are latex-free, reducing the risk of allergic reactions, and are engineered to be touchscreen compatible, allowing seamless use of digital devices without removing them. Ideal for professionals in automotive repair, construction, food processing, janitorial services, and more, these gloves ensure safety, performance, and convenience. Their bright orange colour adds visibility, making them easy to identify and enhancing workplace safety and efficiency on the job.
